Experience

Software Development Engineer March 2024 – Present

Bajaj Finserv Health Limited *Bengaluru, KA*

- Designed and developed Java and Spring Boot backend services for high-volume insurer and partner integrations, enabling core workflows in a TPA-driven insurance ecosystem.
- Built and maintained RESTful APIs (Spring Boot, Node.js) for critical domains such as enrollments and claims processing, handling production traffic at scale for multiple external partner and insurer systems.
- Implemented Oracle SQL and PostgreSQL packages, procedures, and complex queries for transactional workflows, validations, and data orchestration, applying relational database design and query optimization.
- Owned outbound integration services that push claim data from internal systems to insurer platforms, a business-critical step enabling claim settlement and payments.
- Developed interactive front-end applications using Angular, TypeScript, and JavaScript, integrated with Spring Boot REST APIs in a microservices-based full stack architecture.
- Ensured performance, availability, and reliability of business-critical APIs through production monitoring, incident analysis, and controlled CI/CD releases for insurer-facing services.
- Collaborated with product, business, and external partners in cross-functional Agile teams to translate requirements into reliable service contracts with accurate, secure, compliant data exchange.
- Built a template-parsing framework converting JRXML report definitions into structured JSON, enabling scalable data extraction across 1000+ API-driven document generation processes.

GO-AI Associate Oct. 2022 – Aug. 2023

Amazon Development Center *Hyderabad, TS*

- Contributed to process improvements that cut handling time by 20%; assisted in developing Pilot SOPs for GO-AI.
- Streamlined communication so SMEs responded to queries 30% faster; ranked in the top 10% of associates with over 99% accuracy.
- Collaborated with cross-functional teams to refine machine learning algorithms, driving improvements in AI accuracy and responsiveness.

Technical Skills

Languages: Java, TypeScript, JavaScript, Python, C/C++, SQL, Shell Scripting
Backend & Frameworks: Spring Boot, Spring MVC, Hibernate/JPA, REST APIs, Microservices, Node.js, Flask
Frontend: Angular, TypeScript, JavaScript, React, HTML/CSS
Databases: PostgreSQL, Oracle SQL, MySQL, Relational Database Design, Query Optimization
Testing & CI/CD: Git, Jenkins, Azure DevOps, Docker, Kubernetes, RestAssured, Selenium, Locust, Postman
Tools & Practices: Agile, IntelliJ, VS Code, LangChain, HuggingFace Transformers

Projects

Pluton - OBLMS | *Java, SpringBoot, Spring Data JPA, ReactJS, MySQL, Docker, Jenkins* Jan. 2024 – Feb. 2024

- Developed a full-stack loan management system with Spring Boot and React, supporting end-to-end loan workflows and role-based access control (security).
- Designed RESTful APIs with Spring Data JPA and MySQL, containerized services using Docker, and implemented Jenkins CI/CD pipelines for automated builds and deployments.

Education

Sunbeam Infotech Private Limited Pune, MH

PG Diploma in Advanced Computing *Sep. 2023 – Feb 2024*

Pallavi Engineering College Hyderabad, TS

BTech in Mechanical Engineering *July 2019 – Aug 2022*

Achievements

First Prize Winner in Hackathon organized by SunBeam Institute of Information Technology, Pune, and Cavista for developing "Rewarding Health," a healthcare-focused web application demonstrating analytical and problem-solving skills, teamwork, and delivery under time pressure.
